Dream Diary

What is it?

- The Dream Diary is a revolutionary app that gives you the option to interpret your dreams and store them in an online database so that you can revisit them anytime and anywhere

- You can login using our secure signup and stay safe due to our encryption methods

- You can currently store an infinite amount of dreams on the server and browse them all with our simple dream-browsing-catalog

Why should you use it?

- It is believed that writing down your dreams can help you remember future dreams more easily

- It is regarded as one of the best ways to achieve lucid dreaming

- It is simple, easy and fun to use

- It supports most current android devices and the view is scalable for your tablet viewing pleasure

Technical specs

- Minimum SDK API version 15; Android 4.0.3. (IceCreamSandwich)

- Simple; 6 activities and 2 fragments

- REST operations between server and app

- Server built using Spring framework API

How did it go?

- Overall it went well
- All previously defined high and medium priority features were implemented
- However, not most low and nice-to-have features.
- Most features took shorter time than expected to implement.
